

QUESTION BANK – BIOLOGY 1.YEAR

- 1.What is the biology?(describe their branches - anatomy, virology,histology, botany,zoology)
- 2.Living things and their needs (name and describe main needs for the living things)
- 3.Protozoa (main characteristics of the Protozoa and 3 examples)
- 4.Fungi (main characteristics, the dividing,an examples)
- 5.Algae (main characteristics and an examples)
- 6.Coelenterates and flatworms (main characteristics and an examples)
- 7.Annelid worms and molluscs (main characteristics and an examples)
- 8.Crustaceans and insects (main characteristics and an examples,to draw the fly)
- 9.Arachnids and myriapods (main characteristics and an examples)
- 10.Fish (main characteristics of the fish,an examples, to draw the fish)
- 11.Amphibians and reptiles (main characteristics and an examples)
- 12.Warm blooded and cold blooded animals, birds (main characteristics and an examples)
- 13.Mammals (Name and describe three groups of mammals + examples)
- 14.Animal and plant cell(Describe the structure of each one and compare them)
- 15.Tissues,organs,organ systems (organisation of the human body)
- 16.Diffusion,osmosis (describe these processes and compare them)
- 17.Cell division (Describe meiosis and mitosis and compare them)
- 18.Organ systems of human body (excretory,nervous,digestive,breathing and circulatory system)
19. Asexual reproduction of the plants (Name and describe all types of asexual reproduction)
- 20.Food (Why do we need food?main groups of food,vitamins,minerals and diseases)
- 21.Bones (Function of bones and structure of bones + main bones of human body)
- 22.Joints (describe main groups of joints and give an examples + the structure of joints)
