| | |
|-----------------------|---------------------------|
| A/ glacial processes | 1/ gorge |
| B/ fluvial processes | 2/ termite mounds |
| C/ karst processes | 3/ sandy dunes |
| D/ biogenic processes | 4/ corrie |
| E/ eolian processes | 5/ flood plain of a river |

12. Which exogenic geomorphological factor has influenced the formation of relief of the most?

a/ Greenland -

b/ Algeria -

c/ High Tatras -

d/ Bratislava region -

Revision of Atmosphere I.

1. What is atmosphere?

.....

2. Complete the text below about atmosphere. Use these words: *oxygen, air, nitrogen, water vapour*

Earth's atmosphere consist of 78% of, 21% of and 1% of carbon dioxide, argon and This mixture of gases is called

3. Complete the sentences.

a/ Weather are (*short-time (actual) / long-term*) conditions of atmosphere.

b/ (*Climatology / Meteorology*) studies climate.

4. Is the following statement correct? (yes/no).

"Weather is more stable compared to climate."

.....

5. Give the measuring instrument and proper units of measuring the air pressure.

Measuring instrument: Units:

6. Describe the type of weather according the picture.

a/..... b/..... c/..... d/.....

7. Underline correct words in sentence.

The atmosphere protects life on Earth by (*absorbing / not absorbing*) ultraviolet solar radiation and (*reducing / increasing*) temperature extremes between day and night.
