

# Health patterns

Health of a population represents its economic and social status. Countries of the world vary in these terms and different health care levels result in different standards of living.

*The pattern:* .....

## Characteristics:

- Access to safe water (%)
  - 80-100 access: .....
  - 50-80 access: .....
  - 30-50 access: .....
  - <30 access: .....

*The pattern:* .....

- Infant mortality rate (‰)
  - >100: .....
  - 75-100: .....
  - 50-75: .....
  - 25-50: .....
  - 10-25: .....
  - <10: .....

*The pattern:* .....

- Life expectancy at birth (years)
  - >70: .....
  - 50-70: .....
  - 30-50: .....
  - <30: .....

*The pattern:* .....

- Maternal mortality rate (cases per 100,000 births)
  - >1000: .....
  - 800-1000: .....
  - 500-800: .....
  - 200-500: .....
  - 10-200: .....
  - <10: .....

*The pattern:* .....

- Population per doctor
  - >30,000: .....
  - 15,000: .....
  - 5000: .....
  - 1000: .....
  - 500: .....
  - <500: .....

*The pattern:* .....

- Population per nurse
  - >5000: .....
  - 1000-5000: .....
  - 500-1000: .....
  - <500: .....

*The pattern:* .....

## Keywords

access to safe water, infant mortality rate, life expectancy, maternal mortality rate, population per doctor, population per nurse
